

Hi. I am Jasmin,

A german frontend developer.

I'm currently participating in a frontend bootcamp.

About	Work	Facts
<p>Hello there, I'm Jasmin 🙌, a german based frontend developer currently focused on building frontend systems and shaping beautiful interfaces. I'm deeply passionate about creating bridge between business vision and technologie</p> <p>As a front-end developer, I undertand the technology behind it. In the last few months I have implemented many projects with state-of-the-art technologies. At the moment I am in a boot camp that will prepare me for the job of a frontend developer until the end of the year.</p> <p>I love working with agile methodologies in the whole lifecycle of a product in collaboration with the product manager and the whole team. To create the best possible user experience.</p> <p>I want to do something that I enjoy and where I can develop further.</p> <p>Besides my interest in Design / IT / Business I am a huge film lover, a book lover & sometimes a geek.</p> <p>You can visit my personal website at: https://jasmindedic.github.io/</p>	 <p>Instagram clone Front-end Design/Development This project represents the famous social media app instagram.
