

Hi. I am Jasmin,  
A german frontend developer.  
I'm currently participating in a frontend bootcamp.  
In my spare time im trying to improve my UI-UX design skills.

| <p>Hello there, I'm Jasmin 🙋, a german based frontend developer currently focused on building frontend systems and shaping relevant interfaces. I'm deeply passionate about creating bridge between business vision and users expectations.</p> <p>As a (UX) designer, I love working with agile methodologies in the whole lifecycle of a product in collaboration with the product manager and the developers. To create the best possible user experience.</p> <p>As a front-end developer, I understand the development team and — when I am not developing it myself — I always design with the front-end skills of the team in mind. I am able to implement features in vanilla HTML/CSS, JS .</p> <p>I want to do something that I enjoy and where I can develop further. And that is definitely UI - UX design</p> <p>Besides my interest in design / IT I am a huge film lover, a book lover &amp; sometimes a geek.</p> <p>Like i mentioned above in my spare time I am currently learning to become better at creating beautiful designs with figma.</p> |  <p><b>Instagram clone</b><br/> Product Design — Design System — Front-end Design<br/> This project represents the famous social media app instagram.<br/> Made by <a href="#">Jasmin Dedic</a></p> <hr/>  <p><b>Delivery Clone</b><br/> Redesign of the website<br/> Food delivery clone<br/> Made by <a href="#">Jasmin Dedic</a></p> <hr/>  <p><b>Headphones</b><br/> Redesign of the website<br/> Modern looking website<br/> Made by <a href="#">Jasmin Dedic</a></p> | <p>09/2022 - 12/2022</p> <p><b>Frontend development Bootcamp</b><br/> Developer Akademie<br/> Full time bootcamp to learn modern web technologies.
